## INTRODUCTION

The **2024 Annual Breed Show Statistics Report** marks an important milestone as the first-ever compilation of data derived from events run on the Show Assist platform. This report provides a comprehensive analysis of the dog show landscape in South Africa, based solely on the events that were managed through our system. Key metrics such as the total number of events held, participant numbers per event, and breed-specific trends are included, offering valuable insights into the participation and growth of the industry.

As Show Assist continues to support dog show organisers and exhibitors, this inaugural report serves as a critical reference point for understanding patterns of engagement and performance across the shows hosted on the platform. It aims to help clubs, exhibitors, and event organisers identify key trends, opportunities for growth, and areas for improvement in future events. This report not only reflects the past year's data but also sets the stage for future reports, providing a benchmark for tracking progress in the years to come.

## REPORT DEFINITIONS

**Group Club** – A club hosting shows for all recognised breeds within a group or groups

**Specialist Club** – A club hosting shows for some recognised breeds or varieties of breeds within a group or groups
